

WORLD ENVIRONMENT DAY REPORT (SHELTER PROJECT)

On 5th June 2025, the SHELTER Project observed World Environment Day across 20 centres-10 each in Baksa and Udalguri districts, based on the theme “*Beat Plastic Pollution.*” The day began with awareness sessions highlighting the significance of the occasion, its origin in 1972, and ongoing environmental challenges such as pollution, deforestation, and climate change. Students actively participated in discussions, plantation drives involving trees like Mehoconi, Koronj, Neem, and flowering plants, as well as vegetable seed distribution to encourage kitchen gardening. A drawing competition provided a platform for creative expression, while clean-up drives focused on collecting plastic waste from the surroundings. The programme aimed to instil environmental responsibility and promote active participation in creating a cleaner, greener future.
